Hi Kelly

Here is extracts from my bank account.

€100 were taken from Fluvius, but i am on prepaid. Can you contact them to ask why?

Last time you mentioned something about gas and electricity if someone is using the balance, or i miss understood you?

My building for Internet are also very high...

I am with electricity from the day before yesterday. Can you please recharge for me? You don't have to recharge gas because it doesn't work. I need to contact someone to do the technical on the heading system. But I don't know when i will be able, and if so. Just electricity pls

Kind regards

Diana

Dag Diana

Op basis van de rekeninguittreksels die je hebt doorgestuurd, kan op dit moment geen dringende steun gegeven worden. Kan je jouw rekeninguittreksels doorsturen voor de periode van 7 november tot en met 4 december 2025? Dan kan jouw vraag naar de oplading van elektriciteit opnieuw bekeken worden.

Op 14 oktober heb je zelf een betaling aan Fluvius gedaan. Je kan dit zien omdat jouw kaartnummer erbij staat. Hoogstwaarschijnlijk heb je toen zelf een oplading van de prepaidmeter gedaan.

Ik denk dat we ook beter eens afspreken op het gemeentehuis om de papieren voor de klusjesdienst in orde te brengen. Als deze papieren in orde zijn, kan een datum ingepland worden om jouw garage leeg te maken. Mijn collega van het Lokaal

Dienstencentrum heeft jou al proberen te bereiken op alle manieren maar ze krijgt jou niet vast.

Kan je hiervoor langskomen op donderdagvoormiddag 11/12 om 10u?

Met vriendelijke groeten

Hi Kelly,

Thank you for your email.

In regards of the appointment; If provide information already isn't enough nothing will be. I am without heating system for the beginning of October now is mid of December. I have told you about it. Now I am allowed only on the absolute minimum for electricity from last week Tuesday. The reason to reject my request was that 2 months of my monthly income wasn't enough. OCMW needed also from November. And that is OK. What is not ok is to give me an appointment a week later leave me without electricity on top of already I don't have a heating system or warm water. It's not that I ever declined to provide you with any documents you need. So instead of leaving me without electricity for a week OCMW could recharge and tell me to bring the extract with me on Thursday 11.12. I would.

The reason I am in the situation I am, it's not because I did something wrong. Not because I was/am psychotic or endangering myself or other even less my kids. No. Nothing like it. The usual issue asking the police to help me ending up referred to the OCJ.

The help I request from the police it was technical not pathological. Nothing of what I have said was psychotic, confused or a lie. But they couldn't know that could they? The police never looked at my devices or router. It refused to let me file complaint. Just labeled me psychotic and my kids away. "Just for the weekend" So I could clean a bit my house. 3 months later I haven't spoken or seen Ethan since beginning of September. Joost was bringing Kobe 2-3 times in the week for 30min. But from this week not even that the OCJ has forbidden him. And the reason why. Because I have spoken with Joost and we agreed Kobe will stay week with me week with him. So I informed Maya. That actually turns out Kobe's file (most likely Ethan too) was sent to the Public Prosecutor, not only I wasn't asked I wasn't even informed.

Maya had to come 3 times to my home it never came.

The Sporen was going to work with the "family" 3-4 times in a week home visit. For a month. And after they "investigation" OCJ was going to make a decision. Sporen came once at my place to tell me if I need to know how is it going with the kids I need to contact the OCJ. And they aren't here for me but for the kids therefore not further appointments with me. And yet I am there mother that didn't do absolutely nothing wrong.

Still 3 months no one looked at my device, the help I received besides what is above was: labeled psychotic because I asked technical assistance from the police 3 times. 2time It Followed by phone call to OCJ. The third time I was taken to the ER psychiatry. Mobile crises team says I am not psychotic. The document from Orange says that what is on my device is beyond their paycheck. My monthly income reduces. OCMW refusal to cover basic needs not based on condition that is humanly comprehensive, but ultimatum that is humiliating.

Because I dared to ask the police to take my statement regarding technology. And not only work I have in my custody thousands of pages. Forensic snapshots verification. I have sent you documents as well the problem was the the files were "special", so the IT wouldn't let you open them because it could harm the "system". So the problem isn't me being psychotic or speaking without having nothing to support what I am say. The problem was/is and it will be YOU not you as a person but YOU as a broken system that needs to be pulled it out of its root.

Something must interfere if not the humanity will absolutely destroy itself. The system in Belgium is an autoimmune disease.

And what needs to happen isn't and "question" for system to "answer." Not and "answer" for a "question" the system may have. It must be simple Consequences forcing the system to change

Taken all of the above I have decided that is in my best interest to remain myself. I have decided to keep my dignity in situation that demands to stripped me from personhood besides being stripped of motherhood. I will not come to the appointment.

I rather die on my feet cold, hungry and homeless, that live on my knees.

1 thing I will not do is become a death fish dragged by the current.

1 palace i don't belong is psychiatric clinic

1 truth that is undeniable is what have said is the truth fully supported with evidence.

1 lie I will not let go is the system being hold responsible for the crime that have been committed against my children and myself.

Regards Diana
